Have you taken significant steps to 'go green' and improve your environmental performance and reduce your impact on the planet?

Environmental considerations are a key factor in today's building preservation and protection industries, and judges will look at companies who have introduced positive measures in terms of social, economic and environmental factors to help drive their business forward. Tell us:

- How you measure, monitor and/or reduce the environmental impact (transport and travel planning etc)
- About the initiatives you have implemented on site (or, for manufacturers, in product development) to protect the environment
- What business activity has been adopted to reduce, reuse and recycle
- How sustainability is supported through procurement, including internal management procedures and the management of suppliers and contractors
- How energy usage is monitored and reduced
- Which policies and procedures are in place to manage staff health and well-being.

Outline and describe your entry fully – tell us how it meets the requirements of this category. Add supporting videos, photos, testimonials and documentation to support your entry and remember, you can submit more than one entry and enter more than one category.

Deadline for submissions is 11.59pm on Friday 26 April 2024.

Our judges will award scores based on the following criteria:

- **Inventiveness (up to 15 marks):** Is the project original? What is new or different?
- **Practicality (up to 10 marks):** Was the project well planned/researched prior to work commencing?
- **Drivers (up to 10 marks):** What were the key drivers? What issues had to be overcome, i.e. was this an historical/unusual building?
- **Impact (up to 10 marks):** Were any significant technical problems overcome? Was the resolution suitable/well considered?
- **Diffusion/Spread and Adoption (up to 5 marks):** If there is a unique approach, is there potential for this to be adopted by other companies?
