REFERENCES OF SALTS IN POROUS MATERIALS

A set of references is hereby presented to support the three previous '**Paula's Papers: Salts in Porous Construction & Building Materials**'. If you want to know more about salts, not just within construction materials but in other related building materials (linked to archaeological artefacts, mosaics, wall paintings, sculptures or rock-cut facades), you will find a selection of article reviews, book chapters, reports and guidelines on salt crystallization in porous materials.

1. BOOKS AND CHAPTERS

Arnold A, Zehnder K (1991) **Monitoring wall paintings affected by soluble salts**. In: The conservation of wall paintings, Cather S (Ed). The Getty Conservation Institute, Los Angeles.

Camuffo D (2016) **Weathering of Building Materials**. In: Urban pollution and changes to materials and building surfaces, Book Series: Air Pollution Reviews, Peter Brimblecombe (Ed), Vol. 5: 19-64, Imperial College Press, London.

Cooke RU, Gibbs GB (1995) **Crumbling Heritage? Studies of stone weathering in polluted atmospheres**. National Power PLC and PowerGen plc. 68p.

Doehne E (2002) **Salt weathering: a selective review**. In: Natural Stone, Weathering Phenomena, Conservation Strategies and Case Studies. S. Siegesmund; T. Weiss; A. Vollbrecht (Eds), 205, 51-64, Geological Society, London, Special Publications.

Doehne E and Price CA (2010) **Stone Conservation**, An Overview of Current, Research, Second Edition, The Getty Conservation Institute, Los Angeles.

Espinosa-Marzal RM, Scherer GW (2010) **Mechanisms of damage by salt**. In: Smith BJ, Gomez-Heras M, Viles HA, Cassar J (eds) Limestone in the built environment: present-day challenges for the preservation of the past. 331, pp 61–77, Geological Society, London, Special Publications.

Siedel H, Siegesmund S, Sterflinger K (2011) **Characterisation of Stone Deterioration on Buildings**. In: Siegesmund S, Snethlage R (Eds.) Stone in Architecture: properties, durability, 4th edition, pp. 347-410, Springer.

Steiger M (2003) **Salts and crusts**. In: The Effects of Air Pollution on the Built Environment. Peter Brimblecombe (Ed), pp. 133-181, Imperial College Press, London.

Steiger M, Charola AE, Sterflinger K (2011) **Weathering and Deterioration**. In: Siegesmund S, Snethlage R (Eds.) Stone in Architecture: properties, durability, 4th edition, pp. 227-316, Springer.

Trotman, P. Sanders, C. and Harrison, H (2004) Understanding dampness - effects, causes, diagnosis and remedies. British Research Establishment (BRE), IHS BRE Press.

Zornoza-Indart A, Lopez-Arce P (2019) **Stone**. In: Long-term Performance and Durability of Masonry Structures: Degradation Mechanisms, Health Monitoring and Service Life Design. B. Ghiassi and P. Lourenco (Eds), Woodhead Publishing Series in Civil and Structural Engineering, pp. 59-88.

2. PUBLICATIONS FROM INTERNATIONAL CONFERENCES

Bourges A, Verges-Belmin V (2008) **Comparison and optimization of five desalination systems on the inner walls of Saint Philibert Church in Dijon, France**. In: Proceedings from the international conference on salt weathering on building and stone sculptures. *The National Museum, Copenhagen, Denmark*, p 29–40.

Delgado JMPQ, de Freitas VP (2012) **Salt Degradation in Stone of Old Buildings**. 8th International Conference on Diffusion in Solids Liquids (DSL 2012), Istanbul, Turkey. DIFFUSION IN SOLIDS AND LIQUIDS VIII, Book Series: Defect and Diffusion Forum, Vol. 334-335, pp. 337-342 (2013).

Kyriakou L, Theodoridou M, Ioannou I (2017) **Assessment of the durability of lime renders with Phase Change Material (PCM) additives against salt crystallization**. In: Proceedings of the fourth international conference on salt weathering of buildings and stone sculptures (SWBSS 2017), *University of Applied Sciences, Potsdam*, pp 81–89.

López-Arce, P., Doehne E (2006) **Kinetics of sodium sulfate efflorescence as observed by humidity cycling with ESEM**. Two Volume Set: Proceedings of the International Heritage, Weathering and Conservation Conference (HWC-2006), June 2006, Madrid, Spain, *CRC Press*, pp.285-291

Siegesmund S, Ruedrich J, Weiss T (2004) **Marble deterioration**. In: Dimension stone. New Perspectives for a Traditional Building Material. Proceedings of the International Conference in Dimension Stone 2004, Prikryl R (Ed), 14-17 June, Prague, Czech Republic *Taylor & Francis*.

Zornoza-Indart, A., López-Arce, P., Zoghliami, K., Alvarez de Buergo, M., & Fort, R (2012) **Efficiency of salt removal using different poultices and application methods: the case of the Spanish fort of Bizerte, Tunisia**. Global Stone Conference, Alentejo, Portugal.

3. REPORTS, GUIDELINES AND OTHERS

PCA (2013) **Hygroscopic Salts and Rising Dampness**, Damp Proofing DP10/1107, The Property Care Association Publications, Huntingdon, England.

Price CA (2000) **An expert chemical model for determining the environmental conditions needed to prevent salt damage in porous materials**. European Commission Research Report No. 11, Protection and Conservation of European Cultural Heritage. Archetype Publications, London.

Young D (1995) **Rising damp and salt attack**. South, Australia, Department of Environment and Natural Resources and the City of Adelaide, p 21.

Young D (2008) **Salt attack and rising damp: a guide to salt damp in historic and older buildings**. Technical report: Heritage Council of NSW. Heritage Victoria, South Australian Department for Environment and Heritage Adelaide City Council, 78 pp.

Zornoza-Indart A, López-Arce P, Simão J, Leal N, Zoghiami K (2014) **Accelerated aging experiments with saline fog, involving ventilation in calcarenitic monument rocks.** *Comunicações Geológicas* 101, 1181-1185.

5. STANDARD TESTS

ASTM Subcommittee D18.17 (2013) ASTM 5240 standard test method for **evaluation of durability of rock for erosion control using sodium sulfate or magnesium sulfate.**

BRE DG 245 (2007) **rising damp in walls - Diagnosis and treatment.** BRE (Building Research Establishment), BRE Press.

BS EN 13919:2002 **Natural stone test methods — Determination of resistance to ageing by SO₂ action in the presence of humidity.**

BS EN 14147:2003 **Natural stone test methods — Determination of resistance to ageing by salt mist.**

BS EN 12370:2020 **Natural stone test methods — Determination of resistance to salt crystallisation.**

BS ISO 14993:2018 **Corrosion of metals and alloys — Accelerated testing involving cyclic exposure to salt mist, dry and wet conditions.**

BS EN ISO 11997-1:2017 Incorporating corrigendum November 2017 **Paints and varnishes — Determination of resistance to cyclic corrosion condition. Part 1: Wet (salt fog)/dry/humid (ISO 11997-1:2017).**

RILEM (1980) Recommended tests to **measure the deterioration of stone and to assess the effectiveness of treatment methods**, Test V.1a—crystallization test by total immersion (for untreated stone); Test V.1b—crystallization test by total immersion (for treated stone); Test V.2— crystallization test by partial immersion. *Mater Struct* 13(75):175–253.
